## **MEDICAL PRACTICE FINANCIAL AND OPERATIONAL REVIEW**

Peak Performance Physicians, LLC is now offering our Medical Practice Financial and Operational Review, heretofore only available to hospital affiliated and private practice physician clients.

This program is based upon our proprietary "Five Levers of Profitability", where we provide various analyses in the following areas:

1. Reimbursement Systems
2. Billing and Collection Processes
3. Accounts Receivable Management
4. Operations Improvement
5. Practice Growth

While this program does not provide the resources and process redesign contained within our Comprehensive Physician Practice Assessment/Business Plan, the core elements are included with respect to coding improvement, enhancement opportunities regarding revenue cycle management and recommendations for operational improvement and practice growth.

Our findings and recommendations for practice financial and operational improvement are quantified in each of the five major areas for ease of implementation. Therefore, while our fees are based upon the size and scope of the practice (number of providers, locations, etc.), we guarantee our results. If the practice does not realize bottom line improvement equal to or greater than our fees after the first 12 months of implementation, we will return our fees in full! After 25 years of business, we have never had to return any fees, due to our ability to improve practice profitability in any specialty or practice setting.

For further information about our Medical Practice Financial and Operational Review,  
please contact:
